

INTERNATIONAL JOURNAL OF MODERN ENGINEERING

INTERNATIONAL JOURNAL OF MODERN ENGINEERING (IJME) is an independent and nonprofit publication which aims to provide the engineering community with a resource and forum for scholarly expression and reflection.

IJME is published twice annually (Fall and Spring issues) and includes peer-reviewed articles, book and software reviews, editorials, and commentary that contribute to our understanding of the issues, problems, and research associated with the engineering and related fields. The journal encourages the submission of manuscripts from private, public, and academic sectors. The views expressed are those of the authors, and do not necessarily reflect the opinions of the IJME or its editors.
